

CLAIMS

1. Distribution support equipment configured to be run with
use of a computer system and customer-side equipment
accessible to the computer system through a communication
5 channel for supporting distribution related to business dealings
among customers, distributors including dealers and wholesalers,
and suppliers, characterized by comprising:

customer specifying means for specifying a customer who
has made access to the computer system from the customer-side
10 equipment;

route specifying means for specifying each of merchandise
distribution routes for plural sorts of merchandise by separating
one route from another upon receipt of order signals from the
customer specified by the customer specifying means to deliver
15 the plural sorts of merchandise to the customer; and

information processing means for making arrangements
for providing the customer with merchandise items meeting the
order signals through respective merchandise distribution
routes specified by the route specifying means.

20 2. The distribution support equipment in accordance with
claim 1, wherein the route specifying means is configured to
separate the merchandise distribution routes from each other on
the basis of the product number and category of each of the
merchandise items according to predetermined settings.

25 3. The distribution support equipment in accordance with
claim 1 or 2, the information processing means is provided with
directed-at-dealer ordering means for automatically placing

A

11. The distribution support equipment in accordance with
any one of claims 1 to 10, which is provided with purchasing
management means for automatically performing purchasing
management of a customer according to purchasing management
5 conditions determined by a combination of the customer and
customer information specified by the customer specifying means
and the product number of a merchandise item ordered by the
customer.

12. The distribution support equipment in accordance with
10 claim 11, wherein the purchasing management means is provided
with purchased merchandise classification management means
for automatically setting and managing an account item code
used in an organization to which the customer belongs depending
upon a combination of the customer and customer information
15 comprising a budget management unit in the organization
specified by the customer specifying means and the product
number of a merchandise item ordered by the customer.

number of a merchandise item ordered by the customer.

14. The distribution support equipment in accordance with any one of claims 11 to 13, wherein the purchasing management means is provided with power setting means for managing the entitlement of a customer to placing orders in an organization to which the customer belongs while judging whether each customer is entitled to a referencing power or an ordering power.
15. The distribution support equipment in accordance with any one of claims 11 to 14, wherein the purchasing management means is provided with manager support means for providing a manager in an organization to which a customer belongs with purchasing information of each customer in the organization thereby allowing the manager conduct centralized management of a purchase budget of the organization.
16. The distribution support equipment in accordance with any one of claims 1 to 15, which is provided with customer-by-customer based menu management means for enabling customization of setting of a picture displayed on the customer-side equipment and necessary functions of the customer-side equipment on a customer-by-customer basis.
17. The distribution support equipment in accordance with any one of claims 1 to 16, which is provided with free form ordering means for allowing a customer to designate a previously registered dealer to which the customer is capable of addressing an inquiry about an order for a merchandise item which has previously not been established through the customer-side equipment as well as for performing sales management handling

the merchandise item as a special handling merchandise item according to an agreement made between the customer and the dealer in relation to the inquiry.

18. The distribution support equipment in accordance with
5 any one of claims 1 to 17, which is provided with
customer-by-customer based merchandise setting means for
establishing at least settings of original categories, names and
the like of merchandise items on a customer-by-customer basis
aside from categories and names of handleable merchandise
10 items established in the computer system as well as for enabling
merchandise item retrieval based on the settings thus made.

19. The distribution support equipment in accordance with
any one of claims 1 to 18, which is provided with customer's set
product number management means for allowing a customer to
15 establish a plurality of product numbers as a set aside from
product numbers of merchandise items established in the
computer system thereby enabling management based on a
customer's own single set product number and to place an order
also based on the set product number.

20. The distribution support equipment in accordance with
any one of claims 1 to 19, which is provided with supplier's set
product number management means for establishing a set of
product numbers of plural merchandise items for which a
supplier is capable of receiving an order if the merchandise
25 items are combined into a finished product and which are
established as plural merchandise items in the computer system
thereby enabling an order based on a single set product number.

21. The distribution support equipment in accordance with any one of claims 1 to 20, which is provided with automatic delivery time calculation means for automatically calculating a due date for delivery of a merchandise item ordered by a customer by referencing at least delivery situation of a deliverer and working dates of the customer.
22. The distribution support equipment in accordance with any one of claims 1 to 21, which is provided with application support means for registering an unspecified number of users having made contact with the computer system as customers, capable of business dealing through the computer system, the application support means having a function allowing a user to designate a specific dealer by referencing data of dealers previously registered when the user applies for registration.
23. The distribution support equipment in accordance with any one of claims 1 to 22, which is provided with customer registration means for allowing a dealer designated by a user to register the user as a customer of the dealer in the computer system.
24. The distribution support equipment in accordance with any one of claims 1 to 23, which is provided with merchandise information database maintenance means for storing information of handleable merchandise items in a merchandise information database incorporated in the computer system and allowing a supplier contacting the computer system to register information of at least merchandise items supplied from the supplier itself in the merchandise information database or renew the information

~~registered in the database.~~

25. The distribution support equipment in accordance with
any one of claims 1 to 24, which is provided with purchasing
system linkage means for linking up with other distribution
5 support equipment and providing customers utilizing the other
distribution support equipment with merchandise information
stored in the computer system as information of an original
merchandise assortment and purchase prices previously
established on a customer-by-customer basis by matching
10 merchandise categories established in the computer system with
those established in the other distribution support equipment.

26. The distribution support equipment in accordance with
any one of claims 1 to 25, which is provided with supplier linkage
means for linking up with a supplier having an original computer
system accumulating its own merchandise information to obtain
the merchandise information through the computer system of the
distribution support equipment.

27. The distribution support equipment in accordance with
claims 26, wherein the supplier linkage means is configured to
20 enable the merchandise information accumulated in the
supplier's computer system to be utilized as merchandise
information of the computer system of the distribution support
equipment by synchronizing the merchandise categories
established in the computer system of the distribution support
25 system with those established in the supplier's computer system
and applying a ratio variable price established for each
merchandise category to a selling price of a merchandise item

Award. belonging to each merchandise category established in the supplier's computer system.

28. Distribution support equipment configured to be run with use of a computer system and customer-side equipment accessible to the computer system through a communication channel for supporting distribution related to business dealings among customers, distributors including dealers and wholesalers, and suppliers, characterized by comprising:

customer specifying means for specifying a customer who
10 has made access to the computer system from the customer-side equipment; and

purchasing management means for automatically performing purchasing management on a customer-by-customer basis according to preset purchasing management conditions
15 determined by a combination of the customer specified by the customer specifying means and a product number of a merchandise item ordered by the customer.

29. Distribution support equipment configured to be run with use of a computer system and customer-side equipment accessible to the computer system through a communication channel, characterized by comprising:

customer specifying means for specifying a customer who has made access to the computer system from the customer-side equipment;

25 route specifying means for specifying each of business transaction routes for plural sorts of services by separating one route from another upon receipt of order signals at a time from

TOP SECRET//
